ONLY RAIN MAY GO DOWN THE STORM DRAIN

1. Use biodegradable and non-phosphorus soaps.
2. Use high pressure, low-flow nozzles with an automatic shut-off valve.
3. Collect all trash and debris to prevent it from getting into storm drains.
4. Recycle rinse water and collect and discharge all wash water to the sanitary sewer system.
5. Do not discharge any car wash water to storm drains, ditches, or streams.

All Storm Drains Flow to the Roanoke River

THANK YOU FOR KEEPING OUR WATERWAYS CLEAN!

By following these five easy steps, your car wash can help the Roanoke Valley keep the Roanoke River and its streams clean, ensuring a healthier, safer environment for everyone. To learn more, contact the Clean Valley Council at 540-345-5523 or visit www.cleanvalley.org. You can also contact your locality for more information.

Together, we can make a difference.

<p>Contact Info & CV Logo</p>	<p>Close up of hand on sponge washing a car.</p> <p>Water running down a driveway</p> <p>Shot of a river</p> <p>Car washing on lawn</p> <p>Water flowing into lawn</p> <p>Dumping bucket into sink or lawn</p>	<p>A little soap and water can go a long way. When you wash your car in a driveway, the soap, oil and grease can flow into storm drains and pollute our rivers and streams. Always try to wash your car on the lawn. This will allow the water to soak into the ground. If you have to wash your car in a driveway, make sure the water drains onto your lawn and not a storm drain. Use a biodegradable soap. Dump your wash bucket in your sink or allow it to filter through the grass. It is easy to keep your car and our waterways clean by doing the right thing.</p>

ILLICIT DISCHARGE FACTS

ONLY RAIN DOWN THE STORM DRAIN

IT IS **ILLEGAL** TO DISCHARGE ANYTHING INTO THE STORM DRAINAGE SYSTEM EXCEPT STORMWATER AND THE APPROVED DISCHARGES LISTED BELOW . . .

Roanoke County, along with other counties, cities, and towns across Virginia are required by state law to have programs in place to reduce the discharge of pollutants to Virginia's receiving waters, including streams, rivers, bays, and the Atlantic Ocean.

Because of these requirements, the County has adopted an Illicit Discharge Ordinance, which makes it illegal to discharge anything into a storm drain or onto the ground where it may enter a storm drain, **except the following:**

1. Discharges or flows covered by a separate individual or general VPDES or VSMP permit for non-stormwater discharges, issued by the Virginia Department of Environmental Quality; or
2. Non-stormwater discharges or flows, as listed in the following categories:
 - a) Water line flushing;
 - b) Landscape irrigation;
 - c) Diverted stream flows or rising groundwater;
 - d) Uncontaminated ground water infiltration;
 - e) Uncontaminated pumped groundwater;
 - f) Discharges from potable water sources;
 - g) Foundation drains;
 - h) Air conditioning condensate;
 - i) Irrigation water;
 - j) Springs;
 - k) Water from crawl space pumps;
 - l) Footing drains;
 - m) Lawn watering;
 - n) Individual residential car washing (this exemption does not include any commercial or business activity);
 - o) Flows from riparian habitats and wetlands;
 - p) De-chlorinated swimming pool discharges;
 - q) Street wash water; and
 - r) Firefighting activities.

POLLUTANTS THAT ENTER HERE . . .

END UP HERE !

Resources

Report Illicit Discharges on the County's website at <http://www.roanokecountyva.gov/index.aspx?NID=306>. Click on "Report Illicit Stormwater Discharges" and provide a specific location (address of nearest residence) and any other appropriate information.

To learn more about the harmful effects of illicit discharges on the area's receiving waters, see the County's various public education videos, entitled *Illicit Discharge, Detection and Elimination - A Grate Concern*, at the following website: <http://www.roanokecountyva.gov/index.aspx?NID=1598>.

For questions contact:
Roanoke County Stormwater Program Manager

stormwater@roanokecountyva.gov

What's in it for YOU?

TIME and **MONEY**. By installing the right "dirt controls" at the right time - at the beginning of the project - and maintaining them throughout the project, you'll save money and suffer less aggravation. Here are some costs associated with poor maintenance of erosion controls and/or non-compliance:

- Project SHUT-DOWN due to a Stop Work Order
- Damage repair on adjacent properties and waterways
- Missed deadlines, litigation, and change orders from subs for additional work
- Possible civil penalties or administrative fines.

It's just **smarter** to do the job right in the first place. By fighting sediment pollution, you'll save money and time and protect Virginia's precious natural resources.

And . . . the next time you take your children or grandchildren to that favorite fishing hole, there just might be a few more fish to catch!

- Does my project disturb more than 2,500 square feet of land area?
- Do I need to be a Virginia - certified Responsible Land Disturber?
- Do I need an Erosion and Sediment Control Plan?
- Why does "Dirt Control" even matter?

See inside. . .

For more information, contact:

Community Development
(540) 772-2080 (Administration)
(540) 772-2065 (Permitting)

<http://www.roanokecountyva.gov>

COUNTY OF ROANOKE
5204 Bernard Drive, SW
P. O. Box 29800
Roanoke, VA 24018

It's just **DIRT** . . .

"What more do I need to know?"

You need to know . . .

When vegetation and topsoil are stripped from a construction site, erosion is sure to follow. Exposed soil, or dirt, erodes when there's nothing to protect it from rain and wind. This eroded dirt doesn't "just disappear." It usually ends up in a nearby waterway, where it eventually settles to the bottom to become sediment. In fact, this sediment just might find its way to your favorite fishing hole. If so, it won't help your odds of landing "the big one" there, because it smothers the fish eggs and blocks needed sunlight!

The rate of erosion on most construction sites is 500 times greater than what would occur naturally on an undisturbed, vegetated site. That's why urban land development is a major source of sediment pollution. In fact, by volume, sediment is currently the greatest pollutant of Virginia's rivers and streams.

Why is dirt important?

You might wonder why **plain, old dirt** is considered a contaminant. It pollutes by clouding waters, obstructing waterways, clogging storm drain pipes, damaging adjacent properties, and interfering with recreational use and navigation. It smothers fish and shellfish spawning grounds.

Ultimately, excessive sedimentation alters the diversity of fish populations in waterways and affects the organisms on which fish feed.

What should you do?

Keep your dirt on your project site! Be sure to properly install erosion and sediment controls and do so at the beginning of construction; maintain the controls throughout the project.

Also be sure to:

- Select & install controls that suit the site's topography, soils, drainage patterns, and natural vegetation.
- Clear the smallest area possible in which to complete your work, and keep as much of the existing vegetation as possible. Allow cleared areas to remain cleared for the least possible time.
- Install controls that protect your project's disturbed areas from offsite runoff and that prevent sedimentation downstream. Remember, the goal is to keep your dirt on your project!
- Slow down stormwater runoff before it leaves your site.
- **Immediately** stabilize disturbed areas after final grading.

You might also want to ask yourself, "If it rains tonight, will these controls do the job? Will they protect the site and nearby waterways and properties? If your answer is "NO," then you need to add more protection **BEFORE IT RAINS!**

Is there "dirt" training?

YES! The Commonwealth of Virginia, through the Department of Environmental Quality (DEQ), offers training and certification courses for those involved in the various aspects of erosion and sediment control (ESC) compliance and regulation.

All workers who "put the shovel in the dirt" need to be DEQ-certified as a Responsible Land Disturber.

Training and certification is available from DEQ for Responsible Land Disturbance, Plan Reviewers, Inspectors, and Program Administrators.

The courses are based on the Virginia Erosion and Sediment Control Law and Regulations and the *Virginia Erosion and Sediment Control Handbook*. For more information, please visit the DEQ website at: www.deq.virginia.gov.

What about "dirt" permits?

Any land disturbance of 2,500 square feet or more requires a **Land Disturbance Permit** from the County's Community Development Department.

To get the permit, an Erosion & Sediment Control Plan that meets the County's and DEQ's requirements must be submitted and approved by the County's Community Development Department.

To find out more about the land disturbance permit and related fees, please call the County's Community Development Department at (540) 772-2065.

ESC Plan requirements are posted online at: <http://www.roanokecountyva.gov/index.aspx?NID=317>

<p>Contact Info & CV Logo</p>		<p>Everyone loves having a beautiful green lawn, but did you know that lawn fertilizers can pollute our waterways? Before you fertilize your lawn, conduct a soil test to know what fertilizers are needed. Only apply fertilizers during the growing season, and avoid using fertilizers and pesticides within 20 feet of a stream. After you mow, leave your clippings on your lawn because these return nutrients back into the ground. It's easy to keep your lawn green and our waterways clean! Contact the Clean Valley Council for more info.</p>

RE: Landscaping and Water Quality in Roanoke County

Dear Landscaping Professional:

The County of Roanoke has a Municipal Separate Storm Sewer System (MS4) program to protect and improve water quality in its receiving waters, which includes the Roanoke River and its tributaries. Currently, many of these waters are impaired due to excess levels of sediment, bacteria, and PCBs.

Professional landscapers and homeowners alike are often unaware that many pollutants, such as leaf and grass clippings, sediment from bare lawns, and nutrients from fertilizers, end up in the storm drain system, where they are carried via stormwater - UNTREATED - directly to the area's receiving waters. These materials clog waterways, which exacerbates flooding, and damage aquatic habitat.

In addition to causing water quality issues, careless discharge of lawn and leaf debris (and many other items) constitutes an illegal discharge to the storm drainage system under the County's Illicit Discharge Ordinance, which is posted for viewing on the County's website at <http://www.roanokecountyva.gov/DocumentCenter/View/5469>. Please note that there are penalties for noncompliance, and these are detailed in Section 24-5 of the Ordinance.

As part of Roanoke County's public education and outreach efforts, and in its effort to initiate clean-up efforts of local waters, the County is providing information to local businesses to encourage them to refrain from discharging pollutants on the ground or into the storm drainage system. Please familiarize yourself with the enclosed material and make it available to your employees and customers, as appropriate. Should you be interested in obtaining additional copies, please feel free to contact me at 540-772-2096, ext. 245 or by email at stormwater@roanokecountyva.gov.

Thank you for helping to keep the Roanoke Valley's receiving waters clean and pollution-free!

Sincerely,

Cynthia S. Linkenhoker, MPA
Stormwater Program Manager

Memo

To: Diana Rosapepe – Director, Roanoke County Public Library
From: Cindy Linkenhoker, Stormwater Program Manager

Date: July 9, 2015
Re: Stormwater Public Education Materials

Enclosed please find the following documents for distribution among the various County libraries. Should you need additional hard copies of them, please let me know.

- 300 - *"A Stormwater Guide for Homeowners" newsletter*
- 20 - *"No, I Am Not the Poop Fairy" poster*
- 50 - *"Reduce, Reuse, Recycle and Properly Dispose of Hazardous Household Wastes" brochure*

Also, if opportunities arise, please encourage folks to view the stormwater section of the County's website at <http://www.roanokecountyva.gov/index.aspx?NID=331>.

Thank you for your help!

RE: Pet Waste and Water Quality in Roanoke County

Dear Pet Professional:

The County of Roanoke has a Municipal Separate Storm Sewer System (MS4) program to protect and improve water quality in its receiving waters, which includes the Roanoke River and its tributaries. Currently, many of these waters are impaired due to excess levels of sediment, bacteria, and PCBs.

Pet professionals and pet owners alike are often unaware that careless handling of pet waste, such as throwing it on the ground or into a storm drain, allows it to travel - **UNTREATED** - via stormwater runoff directly to the area's receiving waters. Pet waste contains harmful bacteria, such as E.coli and fecal coliform, which can make area waters unsafe for human contact.

In addition to causing water quality issues, careless discharge of pet waste (and many other items) constitutes an illegal discharge to the storm drainage system under the County's new Illicit Discharge Ordinance, which is posted for viewing on the County's website at <http://www.roanokecountyva.gov/DocumentCenter/View/5469>. Please note that there are penalties for noncompliance, and these are detailed in Section 24-5 of the Ordinance.

As part of Roanoke County's public education and outreach efforts, and in its effort to initiate clean-up efforts of local waters, the County is providing information to local businesses to encourage them to refrain from discharging pollutants on the ground or into the storm drainage system. Please familiarize yourself with the enclosed material and make it available to your employees and customers, as appropriate. Should you be interested in obtaining additional copies, please feel free to contact me at 540-772-2096, ext. 245 or by email at stormwater@roanokecountyva.gov.

Thank you for helping to keep the Roanoke Valley's receiving waters clean and pollution-free!

Sincerely,

RE: Restaurants and Water Quality in Roanoke County

Dear Restaurant Owners and Managers:

The County of Roanoke has a Municipal Separate Storm Sewer System (MS4) program to protect and improve water quality in its receiving waters, which includes the Roanoke River and its tributaries. Currently, many of these waters are impaired due to excess levels of sediment, bacteria, and PCBs.

Food Service workers are often unaware that careless handling of kitchen grease, food scraps, and trash, such as throwing it on the ground or into a storm drain, allows it to travel - UNTREATED - via stormwater runoff directly to the area's receiving waters. Some of these waste products contain harmful bacteria, such as E.coli and fecal coliform, which can make area waters unsafe for human contact.

In addition to causing water quality issues, careless discharge of kitchen grease, food scraps, and trash (and many other items) constitutes an illegal discharge to the storm drainage system under the County's new Illicit Discharge Ordinance, which is posted for viewing on the County's website at <http://www.roanokecountyva.gov/DocumentCenter/View/5469>. Please note that there are penalties for noncompliance, and these are detailed in Section 24-5 of the Ordinance.

As part of Roanoke County's public education and outreach efforts, and in its effort to initiate clean-up efforts of local waters, the County is providing information to local businesses to encourage them to refrain from discharging pollutants on the ground or into the storm drainage system. Please familiarize yourself with the enclosed material and make it available to your employees and customers, as appropriate. Should you be interested in obtaining additional copies, please feel free to contact me at 540-772-2096, ext. 245 or by email at stormwater@roanokecountyva.gov.

Thank you for helping to keep the Roanoke Valley's receiving waters clean and pollution-free!

Sincerely,

Cynthia S. Linkenhoker, MPA

GRAPHICS	VIDEO	AUDIO
<p>Contact Info & CV Logo</p>		<p>It is important for both restaurants and home owners to help keep our waterways clean and safe. Never pour cooking oil or grease into sinks, parking lots, or streets. The oil and grease can enter our waterways through storm drains. Always try to recycle the oil and grease or put it into the trash. If you have a spill, clean it up by using a drying agent like cat litter. Never hose down spills. Keep dumpster and trashcan lids closed. Restaurants should clean floor mats and garbage cans in a mop sink. It is easy to keep our waterways clean by doing the right thing.</p>

WHAT'S THE PROBLEM?

When pet waste is disposed of improperly, water quality isn't the only thing that suffers—your health may be at risk, too. Adults working in their gardens, children playing outside and family pets are the most at risk for infection from some of the bacteria and parasites found in pet waste.

REMEMBER:

Storm drains are for rain...

...they're not pooper scoopers!!

Thank you for helping to keep our waterways clean!!

PICK IT UP.....

IT'S YOUR "DOODIE"!

DON'T LET YOUR PET'S WASTE POLLUTE!

TOWN OF VINTON

Phone: 540-983-0601

E-mail: vintoninfo@vintonva.gov

COUNTY OF ROANOKE

Phone: 540-772-2080

E-mail: stormwater@roanokecountyva.gov

HOW TO SAFELY DISPOSE OF PET WASTE.

DOG AND CAT WASTE POLLUTES OUR WATERSHEDS!

Pet waste left on the street or lawn does not just go away or fertilize the grass. The bacteria in the waste is washed down storm drains and into ditches, streams, lakes, and inlets, and can travel for miles in the water. Pet waste contains harmful bacteria such as E. Coli and fecal coliform. Waters that contain a high amount of bacteria are unfit for human contact. While it may not seem like a big deal if one more dog or cat “contributes” some waste to the neighborhood environment, think about how many animals there are out there!

- Clean up after your pets every single time. Encourage neighbors to do the same.
- Teach children how to properly clean up after pets.
- Take advantage of the complimentary waste bags offered in dispensers at parks and greenways.
- Reuse your plastic bags (bread bags, newspaper bags, grocery bags, etc.)
- Carry extra bags when walking your pet or when traveling. Offer extra bags to owners who are without their own bags.

PROPER PET WASTE DISPOSAL

Waste Pickup Bags in a Holder that clips onto your leash are a convenient way to ensure you are always prepared to clean up after your pet.

DISPOSE OF KITTY LITTER AND WASTE PROPERLY

Never dump cat waste and used kitty litter on the ground. When cleaning out the kitty litter box, a two-step approach is the most effective. Cat waste may be scooped out and flushed down the toilet. After scooping out the waste, the used litter should be bagged, sealed securely and placed in the trash.

Dumping the entire contents of the litter box down your toilet may cause plumbing problems.

“DOO” YOUR PART

- Always clean up after your pets!
- Help keep our waterways and environment safe and clean by reporting illegal dumping into the storm drain or sanitary sewer system, clogged storm drains, or overflowing man-holes by calling 540-983-0601 for Vinton or 540-772-2080 for County of Roanoke.

No, I am NOT the Poop Fairy.

In fact, there's no such thing.

I have to poop outside, and that is just THE WAY IT IS.

I do not know how to use a toilet.

And the bottom line is this:

POOP POLLUTES:

- ◆ Neighborhoods
- ◆ Rivers
- ◆ Streams
- ◆ Lakes
- ◆ The Beach

So, do the right thing.

SCOOP THE POOP.

GRAPHICS	VIDEO	AUDIO
<p>Contact Info & CV Logo</p>		<p>April showers bring May Flowers.</p> <p>It also brings a great time to start using a Rain Barrel! A Rain Barrel catches rainwater from your roof gutters, and the clean free water can be used on gardens, lawns, and for outdoor cleaning. Rain Barrel water is free of chemicals, it reduces your water bills, and it is good for the environment. You can buy a pre-assembled kit, or you can build your own with materials from a hardware store. Learn how to start saving Money and the Environment by using a Rain Barrel today! Contact the Clean Valley Council for more info.</p>

Why Reduce, Reuse, Recycle?

Reducing, Reusing, and Recycling all help to limit the amount of waste that gets thrown away, only to end up in the local landfill. Thus, the three R's help save energy, conserve natural resources, and minimize the size of the region's landfill, which also helps save MONEY!

REDUCE - limit waste by not producing it!

- Buy in bulk
- Avoid over-packaged goods
- Make 2-sided copies
- Use cloth napkins & towels instead of paper

REUSE - reuse products whenever feasible!

- Reuse paper or plastic grocery bags
- Rinse and reuse plastic baggies
- Buy used clothes or donate some to charity
- Use plastic plates instead of paper plates

RECYCLE - process old materials into new ones

There are many products that can be recycled:

- Paper
- Batteries
- Plastics
- Glass
- Used Motor Oil
- Tires

PROPERLY DISPOSE of Hazardous Wastes -

Instead of openly discarding on the ground or into a storm drain, take all hazardous materials to Roanoke Valley Resource Authority's Household Hazardous Waste **Collection** facility.

- What types of household products are hazardous?
- What should I do with leftover products like paints and pesticides?
- Is it legal to pour hazardous products on my yard?
- Is there someplace I can take used motor oil and old automotive batteries?

Reduce, Reuse, Recycle and Properly Dispose of Hazardous Wastes in and Around Your Home

A Guide for Roanoke County Residents

Hazardous Products

There are many ordinary household products that are highly toxic to fish, wildlife, plants, domestic animals, and humans if improperly handled or improperly discharged. Some of the products that can be toxic to the environment may surprise you. Here is a partial list:

- Bleach
- Ammonia
- Paint
- Antifreeze
- Motor Oil
- Car Cleaners
- Battery Acid
- Pool Cleaners
- Lawn Fertilizer
- Drain Cleaner
- Detergents
- Insecticide
- Weed Killer
- Herbicide
- Deck Cleaner
- Charcoal
- Cooking Oil
- Gasoline
- Glue
- Hair Spray
- Rat Poison
- Flea Killers
- Televisions
- Light bulbs

If these products are poured onto the ground or into the storm drain, they may pollute groundwater and local receiving waters, like the Roanoke River. The result: **DEAD FISH** and other unhealthy conditions.

Reduce

You can help reduce waste that is headed to the local landfill by simply buying and using less. Be frugal, probably much like your grandparents lived. *Buy what you need and use what you buy!* Then, make sure that you dispose of the containers in a proper fashion, depending upon what they contained. And remember, when disposing of hazardous items, like those listed above, do not dump or pour them onto the ground or into a storm drain, as they hurt the environment.

Reuse

Reuse by selling your unwanted but useable items or by taking them to a donation center. You can donate used clothes, toys, books, appliances, furniture, vehicles, building materials, and many other items. And there are a host of organizations that will gladly accept donated items like Goodwill, Salvation Army, Purple Heart, Habitat for Humanity, schools, churches, and many other organizations. Find one you like and check to see which specific goods it needs and/or accepts.

WHY DONATE? There are several very good reasons to give away your stuff:

- Keeps useable items out of the landfill
- Helps out those less fortunate and in need
- Possible tax benefits

Also, when you need something, try to be used instead of new. Usually, you will find that used items are less costly and are just as good as the new ones.

Dumping trash, household chemicals, and other toxic materials is illegal, and it's unsightly! Not only does it pose a risk for the environment, it is also harmful to plants, animals, and humans.

Recycle

Have you ever heard the old saying that "one person's garbage is another person's treasure?" Well that is sort of the idea behind recycling. Recycling is the process of collecting and processing materials that would otherwise be thrown into the trash and then turning them into new products. There are many familiar items that can be made from recycled materials, including egg cartons, aluminum cans, motor oil, nails, and trash bags, to name a few.

To help keep waste out of the landfill and conserve natural resources such as timber and water, buy items that can be easily recycled and items that have recycled content.

Proper Disposal

Dispose of hazardous household waste products, **for FREE**, at the Roanoke Valley Resource Authority's (RVRA's) Household Hazardous Waste Collection (HHWC) facility. This is a permanent facility located at the Tinker Creek Transfer Station, and it serves residents of Roanoke County, Town of Vinton, and City of Roanoke ONLY.

RVRA's HHWC facility routinely takes some items during normal operating hours, such as aerosol cans, latex paint, used antifreeze and motor oil. Also, RVRA has free monthly collection events on the third Saturday of each month, during which they accept additional products such as bleach, degreasers, batteries, pool chemicals, pesticides, and many other items. For more information, **contact RVRA at**

(540) 857-5820

Did You Know?

The storm drainage system is separate from the sanitary sewer system. The sanitary sewer collects wastewater from sinks, toilets, dishwashers, and floor drains and directs it to a water treatment plant where the contaminants are removed before it is released to waterways.

The storm drainage system, however, collects stormwater runoff from parking lots, streets, and lawns and directs it to streams and rivers without treatment. That is why it is so important to implement Best Management Practices (BMPs) on a daily basis to make sure that harmful pollutants, like bacteria, and chemicals do not end up in the region's local waterways.

Restaurant BMPs Protect Local Waters

Storm drainage pipes often discharge pollutants, such as bacteria, fertilizers, and everyday household chemicals into local waterways.

- What is a Stormwater Best Management Practice?
- Are there Stormwater Best Management Practices for Restaurants?
- What activities around restaurants can harm local streams, creeks, and rivers?
- Doesn't stormwater go to a treatment plant?

Stormwater Best Management Practices for Restaurants

A Guide for Roanoke County Restaurants and Eateries

What are BMPs?

Best Management Practices (BMPs) are methods or activities that may help prevent stormwater pollution. Restaurants use and produce various types of chemicals and wastes that, if allowed to enter the storm drainage system, can have a negative impact on local receiving waters and the region's drinking water supply. Typical wastes from Restaurants include:

- Fats, oils, and grease
- Floor and appliance cleaners
- Food waste

Pollutants from Restaurants enter local streams by way of the storm drainage system, which includes inlets, pipes, ditches, and roadway gutters.

Roanoke County has 13 waterways that are impaired for bacteria, sediment, PCB's, dissolved oxygen, and/or temperature, including the Roanoke River and most of its tributaries.

By following the guidelines in this brochure, food service employees can help prevent stormwater pollution from further impacting local waterways.

What BMPs To Use?

- Connect all sink drains and floor drains to the sanitary sewer system to prevent wastes from entering the storm drainage system.
- Dispose of all wash water (and ONLY wash water) into a sink, toilet, or floor drain.

- Clean floor mats, range hoods, exhaust filters, garbage cans, carts, and trays in a utility/mop sink or floor area which connects to the sanitary sewer.

- Maintain and service sewer laterals and grease traps on a routine basis to prevent sewer overflows into the storm drain system.

- Recycle grease and oil and regularly request pick-up service to prevent overflowing.
- Check dumpsters for leaks and repair or replace as needed; and **KEEP LIDS CLOSED!**
- Regularly pick up trash in the parking lot and outdoor areas. Keep lids closed on all outdoor trashcans.
- Regularly sweep outside areas like parking lots, seating areas, and drive-thru lanes, making sure to dispose of the collected debris in a trash receptacle.

What Actions To Avoid?

- Putting ANYTHING except rainwater into a storm drain inlet.
- Pouring grease, oil, solids, or oily liquids, like sauces, into a storm drain inlet, down a sink, floor drain, on the ground, or into a dumpster.
- Pressure washing parking lots and sidewalks into the storm drain. [To properly pressure wash outside areas, block the storm drain and vacuum up the wash water or pump it to the sanitary sewer system.]
- Washing or cleaning floor mats, filters, and garbage cans in the parking lot.
- Hosing out your dumpsters. Dumpster "juice" has the potential for many pollutants including, oil, grease, sediment and bacteria.
- Allowing grease traps to overflow onto the parking lot.
- Allowing employees to toss cigarette butts outside or into the dumpster.

ONLY RAIN MAY GO DOWN THE STORM DRAIN

1. Properly dispose of all solid and liquid waste. **NEVER DUMP** into storm drain or on the ground.
2. Maintain grease traps or other waste oil containers and use a routine disposal service.
3. Sweep and collect debris, instead of pressure washing.
4. Dispose of all wash water (and **ONLY** wash water) down a sink, toilet, or floor drain.
5. Keep dumpsters and waste containers covered and ensure they do not leak. Do not rinse out dumpsters.

All Storm Drains Flow to the Roanoke River

THANK YOU FOR KEEPING OUR WATERWAYS CLEAN!

By following these five easy steps, your restaurant can help the Roanoke Valley keep the Roanoke River and its streams clean, ensuring a healthier, safer environment for everyone. To learn more, contact the Clean Valley Council at 540-345-5523 or visit www.cleanvalley.org. You can also contact your locality for more information.

Together, we can make a difference.

STORM DRAIN FACTS FOR LANDSCAPERS

ONLY RAIN DOWN THE STORM DRAIN

Introduction

The County of Roanoke has a Municipal Separate Storm Sewer System (MS4) program to protect and improve water quality in its receiving waters, which includes the Roanoke River and all of its tributaries. Currently, many of these waters are impaired due to excess levels of sediment, bacteria, and PCBs.

Many pollutants, such as leaf and grass clippings, sediment from bare lawn areas, and nutrients from fertilizers end up in the storm drain system where they are carried - UNTREATED - to the nearest receiving waters.

As part of the County's efforts to protect and improve local receiving waters, business owners and residents alike are being asked to take a proactive part in protecting water quality and to become part of the bigger effort to clean up these waterways. By following just a few Best Management Practices (BMPs) in your day-to-day operations, you and your employees can make a difference in the quality of stormwater runoff and the receiving waters into which it drains, all while still giving your customers great service and lush, beautiful lawns.

Maintain and enhance natural waterways.

- Avoid clearing, grading, and fertilizing directly adjacent to waterways.
- Avoid dumping grass clippings and leaves into waterways, storm drains, curb and gutter systems, ditches, and detention ponds.
- Plant native vegetation along drainage-ways to prevent erosion.

Implement alternative lawn maintenance practices.

- Install grass alternatives like ground cover, plants, shrubs, perennials, and trees to decrease runoff and pollutants, like fertilizer and herbicide, especially in areas with highly erodible soils and steep slopes.
- Utilize slow release fertilizer or till in some compost on lawns.
- Test the soil every year to ensure that the correct amounts of soil amendments are being used.
- Encourage the use of a Nutrient Management Plan, which is tailor-made for each lawn and details how much fertilizer to use and when to use it.

Reuse or re-direct rainwater to reduce runoff.

- Rain barrels attached to roof downspouts capture rain for later use to water lawns, gardens, trees, shrubs, and other plants.
- Reuse of rainwater decreases the amount of stormwater, nutrients, sediment, and other pollutants that eventually flow to local creeks, streams, and rivers.
- Directing runoff from rooftops, concrete, asphalt, and other impervious areas to lawn areas, instead of into storm drains, minimizes runoff and enhances groundwater recharge.

Utilize proper erosion and sediment (E&S) controls during land disturbing activities, including landscaping projects.

- Sediment from erosion clouds waterways, preventing the growth of aquatic grasses; this adversely affects all other life in such waters.
- Mudlick Creek, Mason Creek, and the Roanoke River are all currently impaired due to sediment. Without proper E&S controls, other local waterways may become similarly impaired from excessive sediment.
- Although your landscaping project may not require an Erosion and Sediment Control plan or a land disturbance permit, it is still important to utilize E&S measures to prevent erosion.
- Employ these BMPs to prevent erosion and protect local receiving waters: (1) install silt fence around bare areas, (2) cover dirt or mulch stockpiles when not being used, and (3) install straw mulch or matting over newly seeded areas.

Report Illicit Discharges to the storm drain system on this website:

<http://www.roanokecountyva.gov/index.aspx?NID=306>. Click on "Report Illicit Stormwater Discharges" and provide a specific location (address of nearest residence) and any other appropriate information.

To learn more about the harmful effects of illicit discharges on the area's receiving waters, see the County's various public education videos, entitled *Illicit Discharge, Detection and Elimination - A Grate Concern*, at: <http://www.roanokecountyva.gov/index.aspx?NID=1598>.

STORM DRAIN FACTS FOR PLUMBERS

ONLY RAIN DOWN THE STORM DRAIN

IT IS **ILLEGAL** TO TIE OR DISCHARGE ANYTHING INTO THE STORM DRAINAGE SYSTEM EXCEPT STORMWATER AND THE APPROVED DISCHARGES LISTED BELOW . . .

Roanoke County, along with other counties, cities, and towns across Virginia are required by state law to have programs in place to reduce the discharge of pollutants to Virginia's receiving waters, including streams, rivers, bays, and the Atlantic Ocean.

Because of these requirements, the County has adopted an Illicit Discharge Ordinance, which makes it illegal to discharge anything into a storm drain or onto the ground where it may enter a storm drain, **except the following:**

1. Discharges or flows covered by a separate individual or general VPDES or VSMP permit for non-stormwater discharges, issued by the Virginia Department of Environmental Quality; or
2. Non-stormwater discharges or flows, as listed in the following categories:
 - a) Water line flushing;
 - b) Landscape irrigation;
 - c) Diverted stream flows or rising groundwater;
 - d) Uncontaminated ground water infiltration;
 - e) Uncontaminated pumped groundwater;
 - f) Discharges from potable water sources;
 - g) Foundation drains;
 - h) Air conditioning condensate;
 - i) Irrigation water;
 - j) Springs;
 - k) Water from crawl space pumps;
 - l) Footing drains;
 - m) Lawn watering;
 - n) Individual residential car washing (this exemption does not include any commercial or business activity);
 - o) Flows from riparian habitats and wetlands;
 - p) De-chlorinated swimming pool discharges;
 - q) Street wash water; and
 - r) Firefighting activities
