## **RFP # 2020-051** **Commercial Tanker for Roanoke County Fire & Rescue Department**

### **ADDENDUM NO. 1**

#### **Clarification of Specifications**

Due Date & Time:  
**March 9, 2020, 2:00 PM**  
**(Local Prevailing Time)**

**RFP # 2020-051**  
**Commercial Tanker**  
**ADDENDUM NO. 1**

1. **Clarification of Specifications** – Prospective offerors have requested clarification regarding the following:

On page 30, Section 5.4 states “A 12V Battery Power, 4 position overload/short protected terminal strip connected to chassis battery...should be installed.” Is this asking for a Power distribution strip with 4 straight blade receptacles?

*Response: We are requesting a terminal distribution block that is wired to the battery (via the battery power switch) to provide a protected/fused place to connect 12 volt accessory loads, such as flashlight and radio battery chargers. It does not need to have receptacles, just a place to wire in additional circuits as we outfit the truck after delivery. It would need to be protected by a fuse or circuit breaker.*
