ADDENDUM NO. 1 TO ALL OFFERRORS:

Reference – IFB 2023-016

Description: 2023-016 - RESTORATION OF WOLF CREEK PHASE II

Issue Date: April 7, 2023

Proposal Due: May 12, 2023

This Addendum # 1 Contains the below information:

- 1) Questions/Clarifications
- 2) Modified/Updated Drawings – **Separate Downloadable Attachment “2023-016 – Updated Plan Set Sheet C-4”**
- 3) Mandatory Pre-Bid Sign in Log

Note: A signed acknowledgment (*Signature Page is at the bottom of the Document*) of this addendum must be received at the location indicated on the original solicitation either prior to the proposal due date or attached to your proposal. Signature on this addendum does not substitute for your signature on the original proposal/bid document. The original proposal/bid document must be signed.

1 – Questions/Clarifications

- 1) **Can you please advise the last day for questions?**
 - a. **The last day and time for questions will be Monday May 8, 2023 at 3:00 PM**
- 2) **Could you please Qualification Statement, Paragraph 7, Specialized Construction?**
 - a. **To clarify Qualification Statement, Paragraph 7, Specialized Construction Experience:**

“Stream restoration” or “bioengineered streambank stabilization”, for the purposes of this bid are defined as projects whose primary purpose is to restore stable natural function or stability to a stream system by re-shaping the stream’s bed and/or banks, planting native woody vegetation (trees and/or shrubs) and using other natural materials such as boulder-sized rocks and logs to construct structures in the stream that re-direct flows and protect streambanks. These projects are distinguished by their

extensive use of natural and native materials including plants as part of the construction, and the requirement of equipment operators to have specialized knowledge and experience in the construction and configuration of flow re-direction structures such as cross-vanes, log vanes and similar structures.

Projects that include work to stabilize streams using traditional means of rock rip rap or other hard stabilization do not meet the definition of acceptable stream restoration projects for the purposes of qualifying for this project

****** Addendum # 1 Continued on Following Page ******

2- Modified/Updated Drawings

Please see the Separate Downloadable Attachment titled “**2023-016 – Updated Plan Set Sheet C-4**” This can be found under the “**Related Documents**” section on the Solicitation Page found here -
